## DISTRICT REPORTS ON WEATHER AND CROPS.

For the week ending on the 17th August 1927.

**Summary.**—During the week the rainfall was generally light and scattered excepting in parts of Midnapore, Bakarganj, Chittagong and Noakhali where it was a little in excess of the normal. Transplantation of winter paddy seedlings is progressing, but more rain is needed for the operation and for the growth of standing crops generally. Cutting, steeping and washing of jute continue, but want of sufficient water for steeping is still being felt especially in some North Bengal districts. Condition and prospects of standing crops are generally fair. The average price of common rice for the province has practically remained stationary as compared with that of the previous week.

1 Syce.

1 Head Gardener.

1 Scytheman.

1 Night-watchman.

The general health of the animals during the year under report has been satisfactory. Casualties throughout the year have been normal, and only such as are unavoidable among a collection of animals in a tropical climate.

No structural improvements of importance were undertaken. Repairs and alterations to existing buildings were effected as follows—

(1) The teakwood flooring of the Burdwan House for large carnivora had become rotten and a new rat-proof patent-stone floor was laid in all the outside dens, each of which was fitted with a small wooden platform.

(2) The sloped teakwood shelter over the roof of the Sonebursa Enclosure having become dilapidated and unsafe it was dismantled and the existing roof was made watertight, rain-water pipes were laid, and a parapet was constructed.

On account of want of funds only those houses which needed immediate repairs were attended to. The usual repairs to roads and paths were postponed for the same reason.

Special attention was given to the Gardens during the rains. Many old trees were cut down and unsightly shrubs cleared and the appearance of the grounds has been much improved. The usual show of flowering annuals was exhibited and much appreciated by the public.

The Garden was awarded several prizes at the Agri-Horticultural Society's Flower Show held in February 1927 for its exhibits of annuals.

The finances of the Garden were seriously affected by local conditions during the early part of the year. These are reflected in the heavy fall in the receipts at the gate, which is attributed to the communal riots. But as the year progressed the position improved and there is reason to believe that the average daily number of visitors to the Garden has now returned to the normal figure. Notwithstanding the reduction in income it has been possible by the exercise of rigid economy to maintain the standard of the Garden and of the collection, which must always be the primary consideration. The need for a margin against unforeseen contingencies has been already stated in Annual Reports and the events of the year under review furnish an instance of how the Garden may be affected by external causes.

The following is a comparative statement of visitors and receipts for recent years—

Year.	Number of visitors.	Receipts.	
		Rs.	A.
1924-25	.. 877,478	.. 64,420	7
1925-26	.. 943,553	.. 67,706	12
1926-27	.. 826,211	.. 58,486	4

A large number of children under four years of age and school children, attended by their teachers, were admitted free. On the occasion of the Fancy Fair on 31st December 1926 and 1st January 1927 about 19,568 people visited the Garden.

In addition, 35,942 persons visited the Garden on free days. A detailed statement of the number of visitors and receipts appears in Appendix B.

The thanks of the Committee are due to those ladies and gentlemen who have added to the Zoological Collection by donations, a list of which is given in Appendix C. Thanks are also due to those who kindly offered to present animals to the Garden, but whose offers could not be accepted, either because the particular species was already sufficiently well-represented, or owing to want of accommodation.

The Committee also desire to express their thanks to the following Railway and Steamer Companies for kindly conveying the animals belonging to the Gardens free of charge:—

E. I. Railway, B. N. Railway, B. I. S. N. Co., Ltd., through Messrs. Mackinnon Mackenzie & Co. and R. S. N. Co., Ltd., through Messrs. Macneil & Co.

The Corporation of Calcutta at their meeting held on 29th October 1926 sanctioned a grant of Rs. 22,495.8 to the Garden for the year under report, and the amount of the rate bills in respect of the Garden was adjusted against the sanctioned grant as the rate bills fell due. The Committee desire to take this opportunity of expressing their thanks to the Corporation of Calcutta for their generous contribution to the funds of the Garden.

Thanks are also due to the Officer Commanding and Officers of the 3rd Battalion, 17th Dogra Regiment, for permitting their regimental band to play at the Garden on Tuesday afternoons free of charge.

The Committee are much indebted to those members of the public who send their old and broken-down horses to the Zoological Gardens.

G. MORGAN,  
*Honorary Secretary.*

P. L. BUCKLAND,  
*President.*

## Superintendent's Report.

I have the honour to submit my report on the condition and progress of the Zoological collection.

## DISTRICT REPORTS ON WEATHER AND CROPS.

For the week ending on the 24th August, 1927.

**Summary.**—During the week light rain fell generally throughout the province. More rain is urgently needed for field operations and for the growth of standing crops. On the whole the progress of transplantation of winter paddy is behind the normal. The condition of deep-water paddy so far is hopeful. Reaping of autumn paddy is well advanced and a satisfactory crop is anticipated. The average price of common rice for the province has risen by about 0·67 per cent. as compared with that of the previous week.

**CORPORATION OF CALCUTTA.**

**NOTICE.**

In compliance with the provisions of section 481 of the Calcutta Municipal Act, 1923, it is hereby notified for general information that the Corporation of Calcutta propose to make the following by-laws under clause 21 read with clause 17 of section 478 of the said Act regulating the erection of culverts in Calcutta:—

*By-laws for the erection of culverts framed under section 478 (21) read with clause (17) of the Calcutta Municipal Act (B. C. III) of 1923.*

1. (a) Every person who intends to construct a culvert over a roadside open drain shall send to the District Engineer concerned an application for permission to execute the work in the printed form annexed to these by-laws which will be supplied to the applicant free of charge.

(b) Such application shall be accompanied by—

(i) a site-plan in triplicate of the land drawn to a scale of 50 feet to an inch and showing all surroundings,

(ii) a detailed plan in triplicate of the culvert with sections and cross-sections drawn to a scale of 2 feet to an inch, and showing—

(a) the width of the culvert,

(b) the height and width of the parapet walls, if any,

(c) complete elevations and sections of the culvert, and

(d) such other particular as may be prescribed by the Corporation.

2. Within 15 days after the receipt of the aforesaid application for permission to erect the culvert or after the District Engineer has been satisfied that there are no objections which may lawfully be taken to the grant of permission to execute the work, the District Engineer shall, by written order, either sanction the plan or refuse it as the case may be:

Provided that no fee or rent shall be charged for the permission to construct or keep these culverts.

3. Any culvert constructed without sanction or in deviation of a plan sanctioned according to these by-laws or in violation of any by-laws herein contained shall be liable to removal by the District Engineer at the cost of the owner.

4. The width of a culvert shall ordinarily be 4 feet, provided however the District Engineer may in the special circumstances of a case allow a greater width not exceeding 10 feet.

5. The culvert shall consist of a masonry floor or sheet iron resting on masonry arches or walls on either side, provided nevertheless in the case of a culvert exceeding 4 feet in width the top of the culvert shall consist of a removable steel sheet.

6. The invert of the drain shall be in concrete and the entire surface of the supporting walls shall be rendered in cement, provided that in the case of a *kutcha* drain, the invert need not be in cement concrete.

7. Parapet walls may be erected over the culvert, provided that no steps shall be allowed. Such walls shall be on either side thereof and shall not exceed 10 inches in width and shall have pointed tops.

8. Ordinarily one culvert shall be allowed for one and the same premises, provided however the District Engineer may in the special circumstances of the case permit one or more additional culverts for the same premises, subject nevertheless to the condition that there shall be an intervening space of not less than 6 feet between the culverts. Such permission shall be entirely in the direction of the District Engineer.

9. Every person intending to construct a culvert shall before the actual commencement of the work send to the District Engineer 24 hours' previous notice of such commencement and shall during the course of construction properly guard, fence and light the site at which the culvert would be erected, and shall immediately after the completion of the work restore the road or street concerned to its original state.

10. The owner or occupier of the premises to which the culvert is attached shall maintain and keep the same in proper repair.

11. A culvert which in the opinion of the District Engineer is no longer necessary shall be removed by the owner or occupier of the premises to which the same is attached, whenever called upon to do so. The decision of the District Engineer on the question of necessity shall be final.

12. The District Engineer will maintain a permanent Register which will contain details of the conditions of the grant of license in each case.

## DISTRICT REPORTS ON WEATHER AND CROPS.

For the week ending on the 31st August 1927.

**Summary.**—During the week the rainfall was generally light and scattered excepting in parts of Midnapore, Jalpaiguri and Noakhali where it was moderate. Transplantation of winter paddy and the growth and development of standing crops generally are being greatly retarded for want of adequate rain. Cutting of jute continues slowly, but want of sufficient water for steeping and washing is being felt throughout the province. The average price of common rice for the province has fallen by about 0·62 per cent. as compared with that of the previous week.
